Why this invoice looks the way it does. Connie bills in four categories, and they never move around: **Direct Usage** is what your team actually consumed, passed through at the wholesale cost we pay, with no markup during UAT. **Indirect**, **Platform Services** and **Support Services** are flat — \$850 together, every month, no surprises. Once a year we lay your billed usage beside the carrier invoices behind it so “at cost” is something you can check rather than something we assert. The flat charges do not true up; that is what makes them flat.
